-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 27 October 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

Paper No(s)/Mail Date. \_\_\_\_.
- ☐ Notice of Informal Patent Application
- ☐ Other: \_\_\_\_.

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of group I comprising claims 18, 19 and 56 – 61 in the reply filed on 10/27/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 38 – 43 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention.

### ***Terminal Disclaimer***

The terminal disclaimer filed on 7/13/2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Pat. No. 6,454,924 B2 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 18, 19, 56, 57 and 59 – 61 are rejected under 35 U.S.C. 102(b) as being anticipated by Ershov et al. (U.S. Pat. No. 5,770,721 A) (hereinafter "Ershov").

Regarding claims 18 and 61, Ershov teaches an assembly structure comprising a dispenser chip 4 including a dispenser body comprising a vertical channel; and a sample chip 1 having a base and a sample structure comprising a pillar 2 and a sample surface, wherein the vertical channel of the dispenser chip is cooperatively structured to receive the pillar 2 (see, e.g.,

Art Unit: 1743

col. 3, lines 6 – 45; figures 1 and 2). If the prior art structure is capable of performing the intended use, then it meets the claim. Apparatus claims must be structurally distinguishable from the prior art in terms of structure, not function. The manner of operating an apparatus does not differentiate an apparatus claim from the prior art, if the prior art apparatus teaches all of the structural limitations of the claim (see MPEP § 2114).

Regarding claim 19, Ershov anticipates that a means for sealing or adhesion can be provided between the dispenser body 4 and the base of the sample chip 1 that is provided from the application of a bind-silane layer (see, e.g., col. 3, lines 46 – 52).

Art Unit: 1743

Regarding claim 56, Ershov teaches that the sample chip 1 can comprise glass or silicon (see col. 4, lines 33 – 41).

Regarding claim 57 and 59, Ershov teaches the incorporation of a capture agent comprising immobilized oligonucleotides (see col. 3, lines 5 – 14). With respect to claim 59, the recitation that an analyte is present in the vertical channel in the dispenser chip is considered a statement of how the claimed device is intended to be used.

Regarding claim 60, Ershov teaches the incorporation of 12,000 pillar structures comprising gel material (see col. 5, lines 43 – 45).

#### ***Allowable Subject Matter***

Claim 58 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 58, the cited prior art neither teach nor fairly suggest that the dispenser body comprise silicon.

#### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Sines whose telephone number is (571) 272-1263. The examiner can normally be reached on Monday - Friday (11 AM - 8 PM EST).
